

REMARKS

By this amendment, claims 2 and 6 have been amended through the incorporation of the respective independent claims 1 and 5. This was done because claims in independent form appear stronger in litigation. No legal change in scope has been made. Given the sizes of likely interstices in the porous elements, the microwave range is anticipated to be most useful.

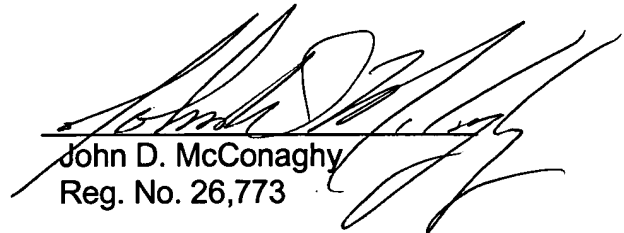

The final fee has not been paid as of the mailing of this Amendment After Allowance.

Respectfully submitted,

FULBRIGHT & JAWORSKI L.L.P.
